Roll no. 39

★ Aim :

Write a Java program to showcase the use of File I/O Exception handling in Java.

★ Objectives :

- To study I/O stream classes
- Understand types of exceptions
- Exceptions handling using various exception classes

★ FAQs :

Q1 Error vs Exceptions

→

Error	Exceptions
• serious issues	• Runtime issues
• unrecoverable issues	• can be caught & handled
• not handled by programs	• Eg. divide by zero
• Eg. System failure	

Q2 Examples of checked & Unchecked Exception

→ Checked (compile time)

- IO Exception
- SQL Exception
- File Not Found Exception

Un checked (runtime)

- null Pointer Exception
- Arithmetic Exception
- Array Index Out Of Bounds Exception

Q3 Key words :-

- try -
defines block for code that may cause exception

- catch -
handles exception

- Finally -
executes always

- throw -
explicitly throws exception

- throws –
declares exceptions

Q4 throw vs throws

→

throw	throws
Explicitly throws exception inside a method	Declares exceptions in method signature

Q5 Byte & Charactor Stream classes

→ Byte stream classes :

- Input Stream , Output Stream
- File Input Stream , File Output Stream
- Buffered Input Stream , Buffered Output Stream

Charactor stream Classes :

- Reader , Writer
- File Reader , File Writer
- Buffered Reader , Buffered Writer
